Lamp Collection

Light, printed layer by layer.

Every piece in this collection begins as a single filament and is built upward, one fine layer at a time, until it holds light the way we intended. Kalpa Creations designs and 3D-prints original lamp forms — sculptural, organic, and quietly precise — for homes that notice detail.

This catalogue presents our current lamp collection, grouped by silhouette family. Where a design is offered in more than one colourway, the variant name follows the collection name.

All pieces are made to order. Custom colours, sizes, and finishes are available on request.
